Interlocking PE/PP Tiles for Ground Reinforcement

Main Advantages

- durable, all weather surface, acts as ideal grass reinforcement
- secure interlocking tiles prevent standing edges
- has a textured surface for safe grip
- resistant to most aggressive substances, tiles do not rot
- grass grows back through the tiles, preserving the character of the environment
- tiles allow water to pass through them. Natural drainage maintained
- no splintering or risk of injury
- can withstand loads of up to 40 tons per m² or even more once laid
- planning permission not required in most countries
- no special tooling or skills required for installation
- easy to install yourself in a very short time
- tiles can usually be rolled into unprepared soft grass surface *
- can be removed later, if required
- low cost of tiles when compared to alternative options
- normally requires no excavation, unlike most other grass reinforcement products

* in extremely wet or muddy conditions or on uneven areas some ground preparation may be required.
